PROFILE

My experience in software development is mainly focused on the development of mobile apps for the Android environment in languages such as Kotlin, Java, XML, Firebase, and specific APIs for the Android environment. Additionally, I also have experience in the most popular architectures or presentation models in the Android environment which include Clean Architecture, MVVM, MVP, MVC. Regarding desktop applications, I have worked with languages such as C #, C ++, Java (in Netbeans), Python, SQL, MySQL among others.

GOALS

I am looking into starting to work for a company and build my way up to the top. My main purpose is to keep developing my professional knowledge. One of my priorities is to keep working on improving the quality of the software I work with, since I know the great importance of creating quality code.

LANGUAGES:
Spanish And English

Education

Administration of computer systems (Certificate of Higher Education HCN)
IES Cesar Manrique. Avenida Príncipes de España, 5, 38010 Santa Cruz de Tenerife, Islas Canarias, España.
2012/2014

General Certificate of Education (GCE)
Colegio Caribe Real. Calle 31 # 82-95, Cartagena De Indias (Distrito Turístico Y Cultural), Bolívar, Colombia
2009/2011

Additional Training

Compose Expert
AntonioLeiva.com - Online course

Architectcoders Program
AntonioLeiva.com - Online course

Clean Architecture in Android.
Platzi - Online course

Kotlin for Android Developers.
AntonioLeiva.com - Online course

Computer technician
Sena Cartagena De Indias (Distrito Turístico Y Cultural), Bolívar, Colombia

Web designer and multimedia
Servicio Canario de Empleo Tenerife, Spain

Programming languages structure C++ (Level 1,2,3)
www.senavirtual.edu.co

Database Administrator
IES Puerto de la Cruz 38400, Puerto de la Cruz, Santa Cruz de Tenerife.

Digital photography course
Casa de la Juventud La Orotava, Santa Cruz de Tenerife.

Skills

Programming Languages

- Kotlin • JetPack Compose • Python
- JavaScript • Java • C++ • C# • HTML
- CSS • XML • Among others

Tools and technologies

- JetPack (Room, Data binding, View binding, Navegation)
- Retrofit Client • Ktor Client • Ktor - BackEnd • Coroutines
- Dependency injection: Dagger Hilt, Koin, Dagger 2 • LiveData
- Firebase • MySQL

Presentation model and architecture

- Clean Architecture • MVVM • MVP • MVC

Work Experience
